Atlantic Centre in meetings in French Guiana

From September 17 to 21, the Atlantic Centre, represented by Deputy Coordinator Captain Luís da Costa Cabral, attended the General Assembly meeting of the Advisory Council for the Outermost Regions (CC RUP) in French Guiana.

The Atlantic Centre was invited to present on “The Role of the Atlantic Centre in Combating Illegal, Unreported, and Unregulated Fishing in the Atlantic,” while also following the other high-level meetings that took place during the week, including the working groups on Pelagic Fishing and the working group on Demersal and Benthic Fishing.

The Advisory Council for the Outermost Regions aims primarily to inform the European Commission and interested Member States about the problems, challenges, and best practices related to the management and conservation of fishery resources.
